

VIVEK KEDIA

PMO PROJECT MANAGER | PROJECT & PROGRAM DELIVERY | ENTERPRISE TECHNOLOGY

+91 7058417832 | kediavivek6@gmail.com | [linkedin.com/in/vivek-kedia/](https://www.linkedin.com/in/vivek-kedia/) | Nagpur, India | 8+ Years of Experience

PROFESSIONAL SUMMARY

PMO Project Management and Delivery professional with 8+ years of experience across enterprise technology, digital transformation, BFSI, and cross-functional delivery. Experienced in project lifecycle management, PMO governance, project financials, budgeting, resource planning, utilization tracking, risk and issue management, dependency management, stakeholder communication, delivery reporting, and Agile execution. Proven track record of managing multi-stream enterprise initiatives, strengthening project governance, improving delivery efficiency, coordinating distributed teams, and driving structured communication across business and technology stakeholders. Hands-on exposure to LLM and AI-assisted solutions through delivery of operational tools using OpenAI and Claude APIs.

CORE COMPETENCIES

PMO & Project Governance: Project Lifecycle Management | PMO Governance | Delivery Governance | Project Hygiene | Quality Management | Process Compliance | Project Reporting

Financial & Resource Management: Project Financials | Budget Management | Resource Planning | Resource Utilization | Effort Estimation | Staffing Coordination | Commercial Proposals

Delivery Management: Risk & Issue Management | Dependency Management | Change Management | Escalation Management | Release Management | Delivery Planning | Agile | Scrum | Sprint Planning

Reporting & Stakeholder Management: KPI Tracking | Management Reporting | Stakeholder Communication | Client Governance | Executive Communication | Customer Satisfaction | Cross-functional Delivery

Technology & AI: Jira | System Integrations | Java | IBM Message Broker | WebLogic | OpenAI APIs | Claude APIs | Prompt Engineering | AI-assisted Automation

SELECTED ACHIEVEMENTS

- 35% reduction in overall delivery cycle time through structured planning and workflow optimization.
- 40% reduction in escalations through proactive process improvements and stronger delivery governance.
- 35% improvement in client satisfaction through enhanced delivery governance and communication cadence.
- Scaled engineering team from 8 to 40+ members while maintaining delivery quality and timelines.
- 100% stakeholder satisfaction across managed delivery programs.
- 30% reduction in change-request turnaround time through process optimization.
- Delivered multiple critical banking integration modules with zero major post-release defects.
- Earned two promotions at TCS based on delivery performance and technical leadership.

PROFESSIONAL EXPERIENCE

Project Manager

HotelKey

Aug 2026 – Present

- Manage enterprise client accounts as the primary liaison between property teams and internal departments, coordinating requirements, issues, enhancements, integrations, and operational requests.
- Strengthen account governance through weekly/bi-weekly client touchpoints, stakeholder updates, action tracking, and structured follow-ups.
- Drive issue and request resolution across Account Management, Support, Product, Implementation, and Integration teams, escalating blocked or delayed activities.
- Maintain structured open-item trackers covering priority, ownership, status, actions, timelines, and closure information to improve project and operational visibility.
- Assess and classify client requirements as configuration requests, bugs, enhancements, support items, or integration requirements and route them to appropriate teams.
- Collaborate with Product teams to validate feasibility, align enhancement requests with sprints, and manage client expectations on delivery timelines.
- Coordinate CRS, OTA, and third-party integration requests by gathering requirements, credentials, mapping details, and vendor information and working with Implementation and Integration teams.
- Monitor cross-functional action items, proactively escalate delays, and maintain clear communication with clients and internal stakeholders.
- Develop SOPs, process documentation, and standardized client-facing materials to improve execution consistency and align expectations across properties.

Associate Project Manager

Valethi Technologies

Oct 2024 – Jul 2026

- Led multi-stream enterprise technology delivery initiatives across finance systems, websites, mobile applications, analytics, and automation projects for a global enterprise client.
- Drove end-to-end project lifecycle management including requirements gathering, feasibility analysis, delivery planning, execution tracking, stakeholder communication, dependency coordination, and release management.

- Owned project planning and commercial activities including RFP responses, budgeting, effort estimation, commercial proposals, and resource planning for strategic initiatives.
- Established PMO frameworks, governance templates, reporting mechanisms, and standardized operating procedures to improve delivery visibility, project hygiene, and execution consistency.
- Managed distributed cross-functional teams while monitoring KPIs, sprint progress, delivery timelines, risks, dependencies, and quality benchmarks across multiple workstreams.
- Coordinated business, technology, and delivery stakeholders to maintain priorities, resolve dependencies, manage escalations, and ensure lifecycle alignment.
- Implemented structured planning and workflow improvements that reduced overall delivery cycle time by 35%.
- Drove proactive process improvements that reduced escalations by 40%, improving delivery predictability and stakeholder communication.
- Supported project financial and resource planning through budgeting, effort estimation, resource allocation, and commercial proposal preparation.
- Developed structured reporting and governance practices to provide visibility into project progress, risks, actions, timelines, and delivery status.
- Designed and developed AI-assisted operational tools including a full-stack Onboarding Tracker and Hiring Process Matrix with defined SLAs and milestone ownership.
- Leveraged OpenAI and Claude APIs and led end-to-end delivery of an AI-powered product initiative covering ideation, scoping, prompt engineering, coordination, and execution.

Technical Project Manager

Tata Consultancy Services (TCS)

Jun 2022 – Sep 2024

- Managed enterprise delivery programs for a leading Latin American financial institution focused on digital payments and banking integrations.
- Collaborated with global stakeholders, architects, and business teams to define roadmaps, release plans, delivery priorities, requirements, and dependencies across multiple workstreams.
- Oversaw Agile delivery execution including sprint planning, dependency management, release coordination, issue resolution, and delivery governance.
- Monitored project financials, team utilization, delivery KPIs, and operational metrics to improve delivery efficiency and account profitability.
- Coordinated cross-functional technology and business teams to manage delivery risks, dependencies, escalations, and project priorities.
- Drove continuous process improvements to enhance client experience, delivery speed, stakeholder communication, and governance maturity.
- Delivered all major milestones on time and within approved budget across managed programs, achieving 100% stakeholder satisfaction.
- Improved client satisfaction by 35% through enhanced delivery governance and communication cadence.

Integration Developer

Tata Consultancy Services (TCS)

Jul 2018 – May 2022

- Delivered enterprise integration modules for multinational banking clients across loans and mortgage domains.
- Built integration services using IBM Message Broker, Java, and WebLogic supporting enterprise banking workflows and transaction-processing systems.
- Participated across the full Agile delivery lifecycle, including requirements analysis, sprint execution, defect management, testing coordination, deployment support, and release activities.
- Collaborated with onsite teams and business stakeholders to troubleshoot production issues and deliver high-quality integration solutions.
- Reduced change-request turnaround time by 30% through process optimization and improved delivery execution.
- Delivered multiple critical banking integration modules with zero major post-release defects and earned two promotions based on delivery performance and technical leadership.

TECHNOLOGY & DOMAIN

Technology: Jira | System Integrations | Java | IBM Message Broker | WebLogic

AI & Digital Transformation: OpenAI APIs | Claude APIs | Prompt Engineering | AI-assisted Workflow Automation | AI-powered Product Delivery

Domain: Enterprise Technology | Digital Transformation | BFSI | Banking | Digital Payments | Loans & Mortgage

AWARDS & RECOGNITION

- 4× Performance Beyond Excellence Award – Tata Consultancy Services; recognized for exceptional delivery and ownership.
- Special Initiative Award for driving organizational learning initiatives.
- Contextual Master Award for business storytelling and stakeholder communication.
- Multiple client appreciation recognitions at Valethi Technologies for delivery quality and ownership.

EDUCATION

B.Tech / B.E. – Computer Science and Engineering (CSE) | 2018

GH Raisonni College of Engineering, Nagpur | Grade: 8.58/10

CERTIFICATION & TRAINING

DevOps Project Management – Internal Training
